

## Corrosion & Erosion Solutions for Oil & Gas Industries

Duromar® Coatings & Linings

Integral process equipment's such as Heat Exchangers, Storage Vessels, Pumps & Valves installed across Refineries are exposed to the threat of corrosion & erosion over the course of operation.

Conventional paints and liners tend to de-bond and perish with time and in such cases, there exists a need for constant refurbishment and asset maintenance activity, that increases maintenance costs & downtime with each passing year.

The **Duromar®** range of 100% solid (Zero VOC) epoxy-based solutions have been used over the past 50 years across refineries around the world, to solve the most complex corrosion, erosion, and asset maintenance issues.

Integral Assets at Refineries & Petrochemical units that **Duromar®** solutions help protect.

1. Heat Exchanger Coolers
2. Storage Vessel Internals & Externals
  - Acid
  - Alkaline
  - Oils
  - Hydrocarbon
3. Pump Casing Refurbishment
4. Online Leak Arrest Systems
5. Secondary Containment Zones

## Duromar® range of 100% solid (Zero VOC) epoxy coating & lining system

1

Easy to Install, Safe & Environment Friendly

2

Outstanding Corrosion & Erosion Resistance

3

Enhanced Asset Life – more than 10+ years under continuous operation

4

Excellent Chemical Resistance

5

Reduced Maintenance Costs & Downtime

Arudra Engineers pvt ltd specialise in manufacturing & installing the Duromar® range of coatings & linings and house NACE approved engineers to help install the most complex protective coating installations at highest quality and safety standards.

Arudra – in technical collaboration with Duromar Inc (USA) – is a licensed manufacturer & applicator of Duromar® range of protective coating & lining systems.
